

Instructions for Use

VAPOR TRAK® ISOFLURANE/SEVOFLURANE MONITORS (8532)

Dosimeters for Personal and Area Monitoring for **ISOFLURANE/SEVOFLURANE** Vapors.

1. Remove monitor from postage-paid mailer and foil pouches, retain packaging for step #8.
2. On Chain of Custody card inside mailer, record person/area to be monitored and START time (indicate AM/PM).
3. For personal monitoring, attach clip to employee near breathing zone (e.g. lapel, shirt pocket) for at least 15 mins. Up to 8 hrs.
4. For area monitoring, attach monitor to wall with clip or double-sided tape. For best results to evaluate potential for employee exposure, place monitor at height of 4 ½ - 5 ½ feet, corresponding to employee breathing zone when standing.
5. At the end of sampling period remove monitor from the person/area.
6. Record sampling STOP time (indicate AM/PM) on Chain of Custody card.
7. Complete all INFORMATION on Chain of Custody card and place back inside mailer.
8. Replace monitor in both foil pouches and postage –paid mailer. Ensure that the right monitor goes with the correct Chain of Custody card inside mailer.
9. For routine samples, use the postage-paid mailer. Analysis will be performed promptly and a written Laboratory Analysis Report sent immediately to you.
10. If quicker service is needed return monitor using an overnight delivery service.

EXPRESS TO: KEM MEDICAL PRODUCTS
